must make decision with the authority to assign resources.)

2. Project description:

2.1 Need description:

In today's environment, there is a need for interactive, dynamic, and innovative game-based solutions to solve corporate problems or strengthen team dynamics.

2.2 Project Purpose / Project Rationale:

Develop interactive Escape Room-style web and mobile software. The project aims not only to provide entertainment but also to serve as a tool for restoring motivation and self-confidence, integrating visual elements, game mechanics, and a customized progression system.

2.3. Overall Objective of the Project:

Design, develop, and implement an interactive Escape Room-style platform (web and mobile app) that incorporates progressive difficulty levels, dynamic mechanics, and a ranking system to encourage user participation

2.4. Specific Objectives:

Design and develop the architecture, mockups, and graphical interface of the platform (Web and Mobile) using the corporate color palette, programming 6 levels with 3 difficulty settings and a guided tutorial, as well as conducting accessibility and performance tests to ensure support for more than 1,000 concurrent users.

3. Theoretical Framework, Project Background, or Legal Background:

Suitable for people 14 years of age and older and designed according to accessibility and inclusion criteria (suitable for everyone, including people with disabilities)

Strict exclusion of adult content (no explicit content, no crimes or violence requiring reporting)

4. Scope of the project:

What the project includes (Description of the solution components)

Name of the deliverable

Description

Acta de constitución de proyecto Project Charter

Documentation and Prototyping

Technical documentation, mockups, and
UI/UX design prototypes.

What the project does NOT include:

- Development of exclusive content for children under 14
- Inclusion of unauthorized topics (drugs, violence, sensitive content).
- Priority or predominant use of the color green within the defined color palette.

Project Success Factors (Assumptions):

- Assignment and ongoing commitment of the development team (Scrum Master and Deputy Masters)
- Availability of server infrastructure to support the projected load of more than 1,000 concurrent users
- Approval of the visual design in line with the corporate identity (use of pink, black, etc., and reducing the use of green)

Project Milestones (Achievements)

Milestone Description	Scheduled Date	Responsible
-----------------------	----------------	-------------

5. Key Project Risks:

Impact for the project	Estrategy mitigation	of Estrategy responsible
------------------------	----------------------	--------------------------

System overload or crash due to a high number of concurrent users (+1,000 users).	Implement performance/s tress testing in the early stages and	Sub Masters / Development
---	---	---------------------------

Acta de constitución de proyecto Project Charter

Rejection or server failure to comply with content restrictions or minimum age requirements (14 years or older)	Set up content filters and user validation during registration.	Scrum Master
Inability to auto-save or loss of data during the session	Develop and integrate a local and cloud-based data persistence system.	Development team

6. Alignment with the organization's strategic plan or ICT plan
